## Register a new use of data

You must register all new uses of the data, including re-use of data already supplied to you, but for a different purpose. Each usage will expire two years from the date that it was registered, however, you can apply to extend the expiry date. Please note that entries are vetted and you may be asked to re-enter information if your description is inappropriate.

If you are working on an existing usage and need additional data go straight to [Usage details](#).

### Intended use of data

---SELECT INTENDED USE OF DATA---

Commercial use is usage undertaken within or under the direction of a commercial organisation for commercial or profit-making purposes. Please note that if you do not choose the correct intended use, you may be in breach of the End User Licence that you agreed to when you registered with the UK Data Service.

### Usage title

### Brief description of usage

Please provide a description of at least thirty words and, where relevant, include information about funding sources. Where it is necessary to pass this information to data depositor(s), if insufficient information is provided, we may need to contact you to request more details.

## Conditions of Use

I understand that these data are supplied under the UK Data Archive [End User Licence](#). I agree to abide by the terms and conditions of the Licence.

## ¿Qué contiene la base descargada?

Contiene el syntax para crear algunos índices de la base para los 4 países (WI, consumo).

Incluye archivos con información de la base de datos de los 4 países (cuestionarios, diccionario de las variables, manual del encuestador, etc.).

Se encuentran las bases de datos en el formato descargado (stata); hay una carpeta para cada país.

Contiene la descripción de todos los archivos en la carpeta e información de general de la base descargada.

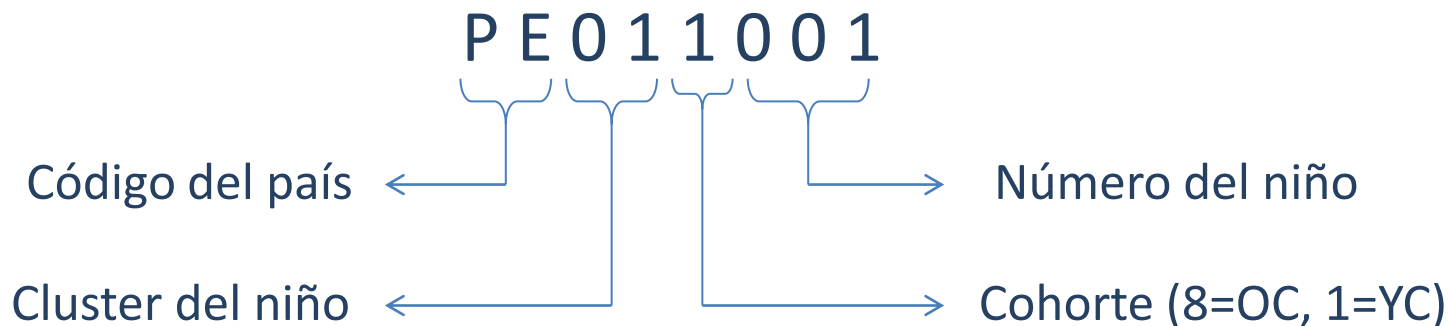

# Rondas cuantitativas de Niños del Milenio

## Puntos importantes:

- 2 cohortes: menor (2052) y mayor (714) en la R1.
- 20 *clusters* en 14 regiones (Ronda 1).
- 3 ronda cuantitativas disponibles (2002, 2006 y 2009).
- 1 encuesta escolar (2010).

## Código único del niño: childid

- Código que consta de 8 caracteres
- Ejemplo:

## Base *roster*

- Nombre de la base:  
“householdmember”, “householdroster”
- Incluye información de los miembros del hogar (educación, uso del tiempo, sexo, edad, etc.).
- *Ej.1 Calcular educación de la madre.*

## Cuestionario del hogar

- Lo responde algún miembro del hogar.
- Incluye información de la familia y del niño (ingresos, activos, salud del niño, antropometría, salud de la madre).
- *Ej.2 ¿Cuántas familias se benefician del programa Juntos? ¿Cuántas cuentan con seguro?*

## Cuestionario del niño

- Lo responde el niño
  - Cohorte mayor (OC): A partir de ronda 2.
  - Cohorte menor (YC): A partir de ronda 3.
- Incluye información sobre asistencia escolar, sentimientos, habilidades sociales, desarrollo cognitivo, etc.
- *Ej.3 Porcentaje de niños matriculados en la escuela.*

## Otras bases

- Son datos de los cuestionarios que no son incluidos en las bases anteriores debido a la forma que tienen los datos (ejm. Tablas donde hay más de un dato para cada niño).
- El nombre de la base indica a qué cuestionario y sección pertenecen los datos.
- *Ej.4 ¿Cuántos niños se dedican a trabajar en la chacra?*

## ¿Cómo combinar las bases?

- Todas las bases de datos se unen usando el código del niño: *childid*.
  
- *Ej.5 ¿Cuántas niñas trabajan en la chacra?*
